

## What is the Florida Engineering Foundation?

The Florida Engineering Foundation (FEF) was established in 1986 to encourage and assist students in pursuing engineering careers and to educate the public about engineering. Founded by engineers, our volunteer-based organization encourages involvement of individuals from education, business, industry, and government. The Foundation is authorized to receive and administer funds for charitable and educational purposes under Section 501(c) (3) of the IRS Code.

### Our Goals

- To **assist students** enrolled in engineering and those interested in an engineering education
- To **provide resources** to programs promoting engineering in Florida
- To **encourage diversity** in the engineering profession
- To **raise public awareness** of the role of engineering in society

### Our Programs

A partial list of programs that we fund include:

- Engineering scholarships
- Student competitions, including MATHCOUNTS
- State engineering fair awards
- Counseling programs
- Mentoring programs
- Minority programs
- Public education programs
- Support to colleges

## Leverage Your Contributions

Your contributions provide the funds necessary to allow volunteers to work. The Foundation is run solely by volunteers. In addition, all Foundation programs are administered by volunteers in the organizations or by the educational institutions with which we work. Our aim is to ensure that the maximum percentage of donated funds directly benefits students.

**Our Mission** To promote and enhance engineering education in Florida in order to position our state as a technological leader in the global economy.

### Planned Giving

Many individuals would like to make a lasting impact through charitable gifts to support organizations and institutions. This can be accomplished through an outright gift, a pledge, annuity, trust, or any number of other creative ways. Please consider the Florida Engineering Foundation in your long-term giving plans.
